- **James R. Roberts, MD, MPH**, Medical University of South Carolina
- **Bonnie Rogers, DrPH, COHN-S, FAAN**, School of Public Health, University of North Carolina at Chapel Hill
- **Gina Solomon, MD, MPH**, Natural Resources Defense Council

The goal of the **Health & Environment Program** is to advance environmental knowledge among health professionals in order to improve public health. Through the development of national agendas, educational programs, and strategic partnerships, we facilitate the integration of environmental health into healthcare provider education and practice, with a special emphasis on children and other populations disproportionately impacted by environmental pollutants.

At the **National Environmental Education Foundation**, we provide knowledge to trusted professionals who, with their credibility, amplify messages to national audiences to solve everyday environmental problems. Together, we generate lasting positive change.
