The National Environmental Education & Training Foundation

1707 H Street, NW, Suite 900

Washington, DC 20006-3915

Support for this project was made possible through Cooperative Agreement CR 827026-01-0 between the Office of Pesticide Programs of the US Environmental Protection Agency and The National Environmental Education & Training Foundation. The conclusions and opinions expressed herein are those of the authors and do not necessarily represent the views and policies of the US EPA.

Acknowledgments

The successful development of this Implementation Plan would not have been possible without the efforts of a large number of dedicated people and organizations. The Expert Panel members gave graciously of their time, experience, and energy in developing the broad national strategies. The members of the Education, Practice, and Resource Workgroups, expertly guided by their co-chairs, contributed their time, enthusiasm, and intensive effort during their workshops. Their hard work has produced this Plan. The Federal Interagency Planning Committee has contributed many hours of guidance and oversight to the development of the Implementation Plan, and significantly helped to organize the Expert Panel and the three workgroups. The Committee also continues to guide the entire *National Strategies for Health Care Providers: Pesticides Initiative*.

The Implementation Plan was developed as part of a cooperative agreement between The National Environmental Education & Training Foundation (NEETF) and EPA's Office of Pesticide Programs. Overall, this Plan is the result of successful collaborative leadership among NEETF, EPA, the federal agency partners and the stakeholders. The team of collaborative partners is pleased to share this Implementation Plan with you. Questions about the content can be directed to pesticides@neetf.org
