WORLD  
WE WANT

# COUNTS

A single drop per second from a leaky faucet wastes more than 3,000 gallons of water per year—enough for 180 showers. Save water and money by fixing household leaks.

**Earth Day 2024**, a project by students of Design for Social Change (course creation and creative direction: Adrienne Leban, Faculty BFA Design, the School of Visual Arts, NYC, <http://www.sva.edu>), done for the National Environmental Education Foundation, [www.neefusa.org](http://www.neefusa.org), with support from Samsung Electronics America. Designer: Junyi Wang. For more information, visit: <https://www.epa.gov/watersense/fix-leak-week#>
